

# WordPress Setup Guide

This guide explains how to configure your WordPress site to accept data from the Pinterest Automation script.

## Step 1: Install Required Plugins

Make sure you have the following plugins installed and activated:

The screenshot shows the WordPress dashboard on the left and a sidebar on the right. The dashboard menu includes: Comments (1,243), Stories, Rank Math SEO, and WP Recipe Maker (highlighted with a red box and arrow). The sidebar features a Feedback section with a 5-star rating and a News section listing recent articles.
