🔗 Pabbly Connect Setup Guide

This guide shows you how to configure Pabbly Connect to work with the Pinterest Automation script.

💡 Why Pabbly Connect?

Pabbly Connect acts as the bridge between this Google Sheet, Pinterest, and your WordPress site. It handles the secure transfer of your images and data to ensure your Pins are published correctly and your articles are formatted perfectly.

Step 1: Import Pabbly Workflows

1. First, create an account on Pabbly Connect if you don't have one.
2. Then, you need to clone these 3 templates and fill them with your data.
Copy the links below and paste them into your browser:

Workflow Name	Workflow URL (Copy & Paste these links)
1. List All Boards	https://connect.pabbly.com/v2/app/workflow/share/AUIUZIMECGsASgVvAGVQd19LAgZXDglqXURRQ1BfVCxRHAVAUxINZ1gUUXMDVFAxVx4AalYKBDlaTIFVUAYBclJLBQcAA1UvVRgBegVADT4BX1R8UzI#
2. Read Board Detail	https://connect.pabbly.com/v2/app/workflow/share/CkJYalAHUjEHTQdtAWRQdwwYCw8IUVU2VUwDEQAPB38GS1QRBEVbMQtHUHJWAQVkUxoBa1UJVmsBFQEFB1EFdgMaADxXVFctUx5WLQZLATIKVFhwUDE#
3. Post Pin	https://connect.pabbly.com/v2/app/workflow/share/XBRWZARTA2BVH1A6BGFUcw8bAAQBWAdkARgBE1ZZVCxQHQRBUxJaMA9DBCZTBAdmXxYDaQBcAz4LH1FVVQNWJQEYVmpXVFYsA04JcgVQX2xcAIZ-BGU#

Step 2: Connect Your Pinterest Account

⚠️ IMPORTANT: After importing, you must connect YOUR Pinterest account in each workflow!
1. Open any step that uses Pinterest (e.g., "Create Pin").
2. Click the blue "Connected" button.
3. If not connected, click to authorize your Pinterest account.
4. Once connected, click "Refresh Fields".

Step 3: Get the Webhook URL from Pabbly

Each Pabbly workflow has a unique Webhook URL that you need to copy.
1. Open your Pabbly workflow.
2. Click on the Trigger step (first step).
3. Find the "Webhook URL" field.
4. Copy this URL (click the copy icon).

Paste these URLs in your Google Sheet's Config_Accounts tab in the corresponding columns:
- "Pabbly Main Webhook" column (for the Post Pin workflow)
- "Pabbly List Webhook" column (for the List All Boards workflow)
- "Pabbly Board Info Webhook" column (for the Read Board Detail workflow)

Step 4: Set the Web App URL in Pabbly

Your Pabbly workflow needs to call back to your Google Apps Script Web App.
1. In Pabbly, find the "API (Pabbly)" action step (usually at the end).
2. Make sure Action Event is set to "Execute API Request".
3. Find the "API Endpoint URL" field.
4. Paste your Web App URL here.

⚠️ Your Web App URL looks like: https://script.google.com/macros/s/XXXXX/exec
Get it from: Extensions > Apps Script > Deploy > Manage Deployments

Summary

What to Copy	Where to Paste
Pabbly Webhook URL	Google Sheet Config_Accounts
Web App URL	Pabbly "API Endpoint URL" field
